***\*\* Special thanks to the prefix owners that have sent through their amendments to the database they are very much appreciated***

**Thursday, 19 March 2009**

I am currently working on merging in the changes / corrections from the ANKC database to existing dogs in the database.

Next on the to major projects list is the linking of photos.

I am always looking for people to go through and clean up their prefixes / affixes, please contact me if you would like an extract of all dogs that carry your prefix, I am more than happy to extract it to Excel and send it to you for clean up.
